ADAMUS™ SAINT-GERMAIN

Shoud 7

IMPORTANT NOTE: This information is probably not for you unless you take full responsibility for your life and creations.

* * *

I Am that I Am, Adamus of St. Germain.

Let's take a good deep breath, as we begin the March 2020 Shoud. Hm. Smell the air. I was doing that while the music was playing. Ah! Such a fragrant smell. Mm. (The Shoud is being held at Villa Ahmyo in Hawaii.)

As you've probably heard, I was here as my incarnation Mark Twain, Samuel Clemens, and I loved the beauty of the island. And even back then, as I was wandering around this island, I said to myself, "I've got to return someday. I've got to come back," and, well, here we are. I'm not in physical body, but I'm pretty close to it. Pretty close to it, using Cauldre's body, all of yours. Hope you don't mind.

A couple notes as we get started today. There's a lot of new ones listening and will continue to be so, so I'm going to be stopping every once in a while and explaining some of the terms we used for the veteran Shaumbra. I like that word, "veteran Shaumbra." Please don't get bored, [this is] for the new ones, for the rookies. For the rookies. I'll try to explain as best I can so you can catch up. You don't get too confused.

So, the other note is that what we're talking about today and actually probably what we're always talking about, but in particular today, may seem a little beyond, a little far-fetched, like science fiction or some fantasy. It's really not. You know the world is changing very, very quickly. A lot of things are happening on the planet, faster than they ever have in the whole history of the planet. But if it doesn't feel right, let it go. Let it go. If it doesn't feel right, just let it go. You don't have to buy into it. You don't have to believe it. Feel what's right for you. That's always the most important thing. Just because I'm saying it, just because I'm an Ascended Master (Adamus chuckles), just because I've had my Realization doesn't mean that you need to accept everything. But I do caution, sooner or later you'll come back and say, "Damn it! He was right. He was right."

Coronavirus

So we need to start off with a discussion of the hottest topic on the planet right now. What's that? Coronavirus. Coronavirus. The coronavirus is more than what it seems, and you'll see perhaps by the end of our session today how this all kind of ties in.

The coronavirus is, well, it's getting the news on the planet right now. Why is that? Well, because ...

LINDA: Drama.

ADAMUS: Drama, but because the news is faster than ever. You get the news very, very quickly and people on social media, people with their blogs and everything else, it's very, very quick. It just goes to show how quickly something can be brought to consciousness on

the planet. Everybody's tuned into it. It's going so fast, the news is spreading so fast, partly because it's drama. It's a lot of drama, and a lot of people feeding into the drama. They love being the one that posts something that's really not true. And there's a lot of mistruths about it right now, but there's a lot of drama. And, you know, my experience is that, as much as people say they don't like drama, they love it. They love it, otherwise it wouldn't be in their lives. Otherwise, they would leave it. They would walk away from it. But they love it. They feed off it. It's kind of like an odd way of reminding them that they're alive. So there's a lot of drama going on on the planet right now with this coronavirus.

Anybody here have coronavirus? I should ask before we get started. Anybody here have it? No? Anybody watching online, any Shaumbra have coronavirus? Hm? Would you admit if you did? If you were sitting here, would you admit it?

Everybody's got it. Everybody's got it. You have the potential within you. You have the genes or the chromosomes that essentially have it. It just hasn't manifested, hasn't been brought to the surface. Just as every one of you has the genes and the chromosomes for cancer and just about everything else nasty that you can get. You don't necessarily get it from out there and it suddenly arrives because somebody comes up to you and gives you a big hug, you know, face-to-face (Adamus hugs Wim). Oh, I'm sorry. I'm so sorry (Adamus chuckles). You've got the potential within you. It's already there. It just is triggered by things, triggered by attention. A lot of attention in the news to it can actually kind of trigger it. So everybody's got it.

So take a deep breath with that. You've already got it. Don't worry. But it doesn't mean it's going to manifest.

In one of our recent workshops, I talked about the coronavirus and I said every virus that there is has its energetic patterns, its origins in something. It's not necessarily what it appears to be. The coronavirus, for

instance, it's the energy of economics on the planet. It's an economic imbalance, so the virus comes in. You know the sexual energy virus? It's a virus of consciousness. It shows up in the body and the mind in different ways, but the coronavirus is an economic virus.

Look what's happening. Not that many people have it. How many people right now do you think are afflicted with it? Any guesses? Any good guesses?

SHAUMBRA 1 (woman): Fifty thousand.

ADAMUS: How many?

SHAUMBRA 1: Like 50,000.

ADAMUS: Fifty thousand. Anybody else? Like two million, a billion maybe? No? It's about 80,000 right now that actually have it. Not all have been diagnosed with it.

How many have died from it? (someone says "Three thousand") Four thousand. Good. Yeah. You either watch the news or you're very intuitive (Adamus chuckles). About 4,000. Now, that's a lot of people. But in the scheme of things, it's not really a lot

in terms of a virus. The normal flu in the United States this year, since the flu season started – when would that be, about October – 39 million people in America have gotten the flu. That's a lot. That's a lot more than coronavirus, but it's not in the news. And out of those, about 30,000 have died from just the common regular flu.

So, you see kind of the strange dynamics, the drama, the imbalance taking place with this whole coronavirus thing. It's in the news. It's everywhere. Everybody's talking about it. People are panicking. People are going to the store and wiping out – no pun intended – the toilet paper supply and hand sanitizers and all the rest of these things. Panic all over. I popped in when Cauldre and Linda were shopping the other day – and, by the way, for those who are new, Cauldre is what I call this Geoffrey – when Cauldre and Linda were shopping the other day, it was crazy. I've never seen anything like it with the people rushing and pushing each other and taking toilet paper off of somebody else's cart and putting it on their own (some chuckles). And that was Cauldre! (laughter) It's amazing. I mean, I couldn't believe, he's my channeler! (more chuckles)

So there's a lot of panic about the coronavirus. In a way, that's good, because it brings a global consciousness. There's nothing else in the world right now that's bringing that kind of attention, focused attention on things. But, at its core, it's really about economics.

You know, every virus, again, has its energy pattern, its meaning in something else. This is the economic virus. And look at what it's doing. Look at how it's affecting the planet. It's affecting everything. Travel – people stop making travel plans. They're in fear. And the chances of them getting this are about .002 percent. About .002 percent. Not a lot. But people are in this hysteria. If they even think the word "airport," they think they're going to catch it. Just thinking the word "airport." It's causing a lot of disruptions and will continue to in anything related to travel – airlines, hotels, business meetings, going to the office. Really anything that requires transactions with groups is going to be affected on the planet.

It's also going to affect ultimately food distribution, because, for instance, the farmer may not want to go to the market. The truck driver doesn't want to haul the goods in. Nobody wants to go to the grocery store, because they're afraid they're going to pick it up there. So it's really going to have a big impact on distribution and goods.

Now, as this happens, as this occurs, it's going to have an impact on the planetary economy of about 3 ½ to 4 ½ percent hit on the economy. And you say, you say – well, how much money do you have in your purse? (to Lydia) Right now, how much money is in your purse? (slight pause) You could take his – take her pur- ... how much money does she have in her – how much money do you have in your pocket?

WIM: Now?

ADAMUS: Now.

WIM: Two hundred dollars.

ADAMUS: Two hundred dollars. So it would be like losing, what, \$4.00 or something. You'd get by. You know, you probably wouldn't miss it. You wouldn't even think about it. Is that all you have in your pocket?

WIM: Yes, it is.

ADAMUS: And you're from Poland?

WIM: Yes.

ADAMUS: And you're traveling around here?

WIM: Because I have a card.

ADAMUS: You have a card. Ohh, you have a card. Well, I was going to give you some money to help with things, because that's all you had.

WIM: Thank you.

ADAMUS: But that's all right. You have a card, but I'll give you the money anyway. Just (Wim chuckles), just, just ... (Adamus hands him some cash) Okay, to help you get around the island. Yeah (Audience says "Ooh!" and some applause).

I'm trying to make a point also – let abundance come to you. If you're worried about this whole thing, let abundance come. He didn't even ask for it. He didn't want it, but he got it. Start expecting that, by the way.

It just comes to you. You didn't come here thinking you were going to get paid to sit here. Yeah. He's saying, "I'm never going to spend that!" (some chuckles)

So, it's going to have an impact, let's say, about 3 ½ percent, maybe 4 ½ percent of the global economy. Now, that's a lot of money. That's a lot of money, but not really, because after this whole scare thing is done, things will get back to normal. People will need to go back and replenish their supplies, and then they're going to think, "Oh, boy. I didn't have enough toilet paper. I didn't have enough emergency food. Now I better stock up on that also." And so they're going to buy a little extra.

But ultimately, it's bringing a focus, a worldwide focus. Ultimately, the thing it's going to affect most is the economy, but ultimately it's going to get back to where it was. If you are in the stock market, if you're an investor, invest now when the prices are down, because it will go back up. I mean, some of the airlines, a few may go out of business, but they'll figure out a way to get your money sooner or later. They'll be right back in the black pretty soon.

But I want you to feel into what's really happening on the planet, the scare with it, the fact that really not that many have it. Worst case scenario – I've done some calculations – worst case scenario is you're going to get maybe 100 to 140 million people that have it. That's a lot of people. That's a lot of getting sick. That's a lot of laying in bed. But ultimately the mortality rate, the death rate, is actually not that high. It's similar to or slightly higher than a regular flu.

So, yes, a lot of people die, and I'm not glossing over that fact, but it's just something that's on the planet like cancer, like anything. It's going to happen. I'm not taking it lightly, but I'm saying let's not overreact to it. Let's see it for what it really is.

Economic Balance

And, more than anything, I'm hoping that with Shaumbra they stop and take a look at their own economic balance. Their own economic balance. One of the most frustrating things I've had to deal, with in dealing with all of you wonderful Shaumbra, is the money issue. The money issue, and we've talked about it, ad nauseam, on and on and on. And there are some who are still insisting on their lack of abundance, and then they're doing it from a mental standpoint. They're saying, "Well, I've never had any and I don't know how to get it, and it's corrupt, and it's the big companies and big businesses." So you're going to continue that way. I want you to just stop and say, "No, I am abundant. I allow that abundance." You don't have to know anything about making money. You don't have to have a high paying job. You don't even have to quit the job you have now, and I know to the mind, it says, "Well, that's nice talk, but the reality is ..." The reality is what you want it to be, not necessarily what you think it to be. So you shift your whole perspective about abundance and about the economy.

I hear so much from people complaining that it's all these big corporations that are doing all this nasty damaging things to them and to the world, and, you know, that's being a victim. It really is. I'm not defending

big corporations, but what I've seen is they get so big they fall apart. You know, what really makes the world move are the small companies, starting with the farmers, and then going to the small shop owners and the small entrepreneurs and the small inventors and creators. That's the real movement.

Once things get up into the big corporate level, it slows down. It gets inefficient. There are very, very few risks that they take, and eventually they're disrupted and replaced. It's kind of almost a natural rhythm. They get so big, they can't really do anything anymore and then internal corruption will set in and eventually they fall apart. Look at some of the big companies that don't exist anymore. I mean, big in your lifetime. Cauldre's giving me some information on that – Kodak. Kodak was huge. You found Kodak everywhere. Where are they now? Nowhere. Nowhere.

So I want you to stop, in this whole time of the coronavirus – which is going to last approximately six months, you're going to see it on the planet and it's going to be in the news, there's going to be a lot of fear and concern about it – I want you to stop and really assess your own economy. Do you need a virus, this virus that's kind of already in your body, do you need it to come forth to do this battle which affects your health? Or are you willing to allow abundance?

And don't worry about where it comes from. You don't have to start a business or anything like that. You actually don't have to do anything except allow it and then it's there. Look at Wim. Ascended Masters handing him money, and he's not even asking for it (Adamus chuckles).

So it's a big scare right now that's out there taking place, a really big scare, and people feed off of it. But just stand behind the short wall, as Tobias said. In other words, you're aware of it but you're not getting involved in it. Stand behind the short wall and really take a look at what's going on, how it's affecting the planet. It doesn't matter really actually what it is. You know, it's the coronavirus, but it doesn't matter what it is; look at how it's affecting people and look at how it's affecting the economy, in particular, how it's affecting the planet.

The planet was kind of due for an economic adjustment, and I'm not talking about a market crash. I'm talking about an adjustment. Nearly every company on the planet right now has to stop and take a look and say, "What do we do? Do we have all of our staff members work from home? What do we do if we can't get goods from China or India? What do we do if there is an outbreak in our distribution system and we can't get the components that we need? What do we do if one of our staff members falls sick with this?" Nearly every company, at least in the western world, is having to stop and take a look and say, "What if?"

So that's really actually, in a way, kind of incredible, because it's causing this consciousness focus. Most people don't know it's about money or the economy, but they know they have to stop and do something. It's going to affect businesses more than anything.

So, a couple of things. What for you to do? First of all, take an assessment of your own abundance level. Does it need a virus to move in to shake things up? Are you truly allowing abundance or are you still playing the victim? Are you truly opening and allowing abundance?

And then what next? What else is happening with this whole virus? It's kind of interesting, really fascinating. It's going to cause people to stay home. It's already doing that. People stay home, canceling travel plans, not going to meetings, not even wanting to go out to the store, any place where there's a gathering, a sports gathering or anything like that. So you're going to find a lot more people sitting at home watching TV – Cauldre tells me there's something called Netflix – watching Netflix or just sitting on the computer creating more drama about the coronavirus. So it's causing people to have to go home, kind of a cocooning time. It's kind of interesting.

And what you're also going to see is kind of a side effect from a lot of people staying home, and they're going to be doing a little bit of office work, but not as much as normal. Now they have this extra time and a lot of them are going to be bored. Instead of using that extra time to, let's say, do something for their health or their wellbeing, their spiritual being even, they're going to sit at home being really bored and creating more drama. So that's what you have to look forward to between now and probably the end of summer, maybe a little bit beyond that.

For yourselves, you've been staying at home a lot more. And when I say home, not just your physical home, but you've been going inward for year and years now. As you come into your Realization, you've been staying inward. You've already been avoiding

the crowds and, I mean, most Shaumbra really don't have a big desire to go to a sports game with thirty, forty thousand other people. They cringe at the thought. Not even a rock concert, unless it's somebody really good. You've been staying home. You've been kind of cocooning for a long time now.

What to do? Not worry about it, and Cauldre just asked me a question. He does that right in the middle of – I'll be talking and he's channeling, but we talk back and forth at the same time, and then I talk to Linda and we talk about Cauldre while he's trying to channel and he can kind of hear it. But it's really not that confusing. I mean, for him it is, but for me it's not.

So he asked me, "So what about taking more vitamin C?" (Linda giggles) He did. "What about taking more vitamin C? Is that going to help?" And I'll say yes, on two counts. Vitamin C is pretty good anyway and according to what Linda says, you can't take too much. Your body dispels it, gets rid of it. So it's not like you're going to OD on orange juice or anything or vitamin C. Vitamin C is really good, and it'll be coming out more and more in the news pretty soon that vitamin C is a good preventative for the coronavirus.

I think it's interesting though. I look at vitamin C as like 'vitamin C' as in 'consciousness.'

LINDA: Ooh!

ADAMUS: Ooh! Ooh! So take more vitamin C and take more "C" just for consciousness. Allow yourself to be more aware, more conscious of what's going on.

So that's my little bit about coronavirus. I'll take any question about that before we move on or move to the next level. Any questions about the current coronavirus, all the implications? None?

LINDA: Ooh! Guess you're good.

ADAMUS: Yeah, yeah or they're sleeping, but that's okay (Linda chuckles). All right.

Disruption and Distraction

So, one of the things that is definitely going to happen with the coronavirus is – two things actually. One is disruption. You're already seeing it in everything from travel to supplies at the store. There's going to be a lot of disruption that just kind of expands out into just about everything. I'm not saying a total shutdown, but a disruption, and things that you've been used to having right away may not be available right away. Those of you who live here on the island, you're used to that, but those on the mainland aren't necessarily. They want it now, they get it now.

So, it's going to cause a lot of disruption in *everything*. I mean – just kind of scanning – court hearings. Not that it's a big deal, but it's going to disrupt that. Any type of conference, any type of big gathering, it's going to disrupt that. It's going to have an impact all around the world of being very, very disruptive. But you're used to that. As you come out of awakening and come into your mastery, everything is disrupted. So it's not going to be a big deal for you to handle that level of disruption.

actually like the distractions, like the politicians, because then they don't have to do things like build new hospitals or repair roads or pass bills that make sense, that aren't so stupid or fight with each other or anything like that. So it's a huge distraction and they're going to capitalize on it.

The other thing that I'm finding very, very interesting about it is that it's a huge distraction. I mean a *huuuuge* distraction, and some people really

It's a huge distraction also because it's not the real issue on the planet. It's not the real issue. It's a very temporary and very distracting, drama-filled issue on the planet right now. But it's not the real issue.

The Real Issue

Let's stop for a moment and just feel into what that real issue is. I'm going to ask for a little music while we do our feeling and contemplating into this.

So there's all this stuff going on about coronavirus and you're going to read more and more about it, and there's going to be a lot of fake news about it. There'll be some good real stuff, but it's a *huge* distraction that's taking place.

Take a moment to feel in. What's really going on?

(music begins)

And all of you watching in online, all of you here, yes, I could easily just give you the answer, but I'd like you to feel it first.

(pause)

So, this coronavirus in the news. Geez, even here we're talking about it in a Shoud. I don't think we've ever done that before. It's a big distraction. What's *really* going on?

(pause)

Okay, stop the music for just a moment. Just cut the music a moment. Just pause.

(music stops)

Okay, you're all thinking way too much. That was a mess. I mean, all of you, even you sitting at home, even the ones who are asleep. It was a mess.

Okay, let's try it again. We'll get the music going again. Take a deep breath and really feel into what is going on right now and get out of your brain. Get out of just the human side of it. What is going on?

Okay, take a good deep breath and music.

(music begins, long pause)

Okay, pause please.

(music stops)

That was a little bit better, but you still – do you feel your confusion or do you feel clar- ... no, you don't feel clarity. I know that.

Okay. Let's take a *really* good deep breath, and don't think about it. Just feel into it. What's going on? You've got this whole distraction and disruption with coronavirus on the planet. It's masking something else that's taking place. Masking something else.

Okay, music again.

(music begins)

Let yourself go beyond.

(long pause)

Okay pause.

(music stops)

Okay, we're getting a little better. We're still kind of stuck. Some of you watching in are really starting to get it, but not a lot. Okay, but I'm going to ask Linda to run with the microphone and we'll take a little survey of what you were feeling. Okay, Linda. What's really going on with this [virus]? You've got this huge distraction, but what's happening underneath?

SHAUMBRA 2 (woman): I think it has to do with sovereignty.

ADAMUS: Sovereignty.

SHAUMBRA 2: Yeah.

ADAMUS: Yeah, ultimately everything does. Yeah.

SHAUMBRA 2: Self-worth.

ADAMUS: Self-worth.

SHAUMBRA 2: The feeling that – people don't feel like they are – especially in China where it started. People don't feel like they deserve to be free.

ADAMUS: Uh huh. Good.

SHAUMBRA 2: And I think it's going to be the beginning of the freedom for them.

ADAMUS: Okay.

SHAUMBRA 2: Hopefully anyway.

ADAMUS: Yep. Good. It's actually correct. Not exactly where I'm going, but that's correct. But where I'm going – eh – I don't know if anybody will be able to figure that one out.

SIGLINDE: Couldn't quite un-hear ProGnost. So I'm thinking on the one hand there is the technology revolution where consciousness can expand that way, and the spiritual side, we can embody living energy and then comes this danger outside of you. So, as a reaction to the potential of the planetary awakening.

ADAMUS: Yeah, it does. It's similar to what we talked about in ProGnost, all the technology changes. Good. Yeah, you're in the right ballpark anyway. Good. A couple more. What were you feeling? Just go crazy with it.

LULU: Well, I think it's a turning point to actually make a change and go deep.

ADAMUS: Yeah. Turning point for who, you?

LULU: For – I think it could be also in technology. Because of this, now technology is going to try to find out what it is.

ADAMUS: Right.

LULU: And with that it's going to go farther with the information, and it's going to open consciousness into these other humans.

ADAMUS: Good. Yeah. Getting very close. Good. A couple more. What do you think is really going on with all this?

SHAUMBRA 3 (woman): I feel people become very honest to say, "I don't like others."

ADAMUS: (chuckles) Right. That's – yeah.

SHAUMBRA 3: Others, yeah. I think, yeah, we are wearing masks, so.

ADAMUS: Yeah, it's kind of an effect of it. It's not *the* reason, but all of a sudden you have a good reason not to want to be with people and to tell somebody you don't like, "I just want to be with you," you know. You don't have to tell them you don't like them, but you've got a good excuse. It's like, "Eh – *cough! cough! cough!* – I think I'm coming down with something. Maybe we shouldn't get together." Okay, a couple more.

RON: Well, I keep seeing the parallels of the political environment and the separateness and everybody separating and separating. I was wondering if it was in the stars a year ago or two, but it's the same darn thing, and I think there's some self-discovery that really happens.

ADAMUS: Yeah. Yeah. Good. These are all good. Not quite there, but they're all good.

SHAUMBRA 4 (woman): Well, what came to me was maybe people are projecting their confusion, the anxiety level.

ADAMUS: Yeah, they are. I mean, it's a great opportunity to do that. Their fear – there's a lot of fear going on right now.

If you could get people to pay for fear, you'd be a millionaire right now, because they're into the fear. But yeah. Good. One more. One more. What's really going on right now?

SHAUMBRA 4 (woman): I'm thinking maybe another call for a 9/11.

ADAMUS: Oh, interesting. Terrorists?

SHAUMBRA 5: No.

ADAMUS: Oh.

SHAUMBRA 5: A wakeup call.

ADAMUS: A wakeup call. Yeah.

SHAUMBRA 5: To bring people more – to alert people.

ADAMUS: Yeah. So they're tuned into all this that's going on, but how is it going to change their life ultimately?

SHAUMBRA 5: To awaken.

ADAMUS: To awaken.

SHAUMBRA 5: To awaken.

ADAMUS: Okay.

SHAUMBRA 5: Just like all of us are.

ADAMUS: Okay.

SHAUMBRA 5: You know, to awaken the sleeping.

ADAMUS: Okay. That's good. Okay.

So my answer – and some of you were really bordering on it – but my answer is it's really distracting from what I consider to be the biggest virus on the planet, which then has other implications we'll talk about today. The biggest virus is technology. Technology. And it's not something a lot of people are talking about in terms of where it's going and how quickly it's going and what it's doing to humanity. So we have this other stuff playing out here and everybody's forgetting to really look at the real virus is occurring in technology. And it's interesting because software can get viruses. Everybody is afraid of software viruses. Equipment can actually get viruses, but technology in itself is like a virus on the planet right now. In other words, it's there. It has the potential to go this way or that way. It could make things on the planet really sick or actually it can also eventually make things on the planet really great. But that's kind of the big issue, and that's why when you said ProGnost that, yes, it's all related to that type of thing. It's the biggest thing happening on the planet, but yet so few people talk about it.

It is changing not only humans and changing humanity, it will eventually change all of creation. What's being done right here on the planet with technology will eventually change *everything* that's out there.

So feel into that again, again with the music, if you would, Peter. Let's feel into this technology thing. And I know I talk about it a lot because it's so important.

(music begins)

It's the reason why you're here at this Time of the Machines, time of technology. It's why you delayed your own Realization several lifetimes so that you could be here right now. It's the biggest thing happening on the planet.

But it's kind of, well, not hidden, but it's quiet. People would rather talk about coronavirus, which will be gone in a matter of months or by the end of the year. But they're not talking about the real virus, the virus that ultimately will affect the human body, because technology will make it possible to be, well, half-human, half-robot.

They're not talking about how technology is shifting consciousness on the planet. They think of technology as some nerd sitting writing software and then end-users using it to make things a little more convenient.

How many apps do you have on your smartphone, on what I call your looking glass? How many apps, 30, 40, 50 maybe? All designed to make things a little bit more convenient. But, you know, this is the breeding ground for a virus.

In other words, people are not stopping to really feel into where technology is going. And I'm not saying it's bad at all. I love a lot of the technologies, but where is it all going? That's the real virus, and it hasn't surfaced yet.

You say, "Well, how does a virus surface, a technology virus?" Well, two ways. Software issues, of course. The potential to infect software all around the planet, things you consider essential for everyday life now. You wouldn't have thought that 20 years ago, but now it's essential.

But eventually this same virus has the potential to affect the human body, just like the coronavirus. It would show up in some type of influenza, in something that's actually already in the body, some potential imbalance that's already in the body but just hasn't been manifested yet. It could be a flu. It could be something else. So that potential is sitting there and that would make the coronavirus look pretty small by comparison.

Let's take a deep breath with that. The real virus all has to do with technology.

And not to be afraid of it at all. When you understand it, when you have consciousness and understanding, there's nothing to be afraid of at all. And when you're not afraid of it you're not going to attract it, and it's never going to be a part of your life.

So that's why I say it's a total distraction right now – this whole coronavirus, total distraction for everything – for politics, for businesses, for everything.

(music ends)

Even drug dealers, they're having a tough time with this, you know, because they've got to get their illegal drugs to the market. That means people touching each other, touching the merchandise. I mean, not just regular businesses, but *all* businesses. And I'm sorry, some of you are disheartened by that (Adamus chuckles), but let's take a good deep breath.

The Next Six Months

There's something else that's happening right now, I would say even bigger than the technology that's taking place on the planet. It's kind of as a result of everything with technology, but it's happening right now.

Before I go any further with it, let's put that music back on. I'm going to drive Peter crazy today.

(music begins)

I want you to feel into these next six months, first personally, on a personal level. Feel into the next six months of your life. That would put us in September. The next six months of your life. Can you feel out that far? I'm not talking for little details, but just general feeling out in the next six months of your life.

(pause)

Most people are capable of looking out – feeling, let's say – feeling out about two weeks. I'm asking you to feel out about six months. Again, not details, not like psychic predictions, but what's the general feeling in these next six months?

(pause)

And when I say general, does it feel, well, is there some anxiety there? Confusion? Maybe nothing? Maybe great freedom and joy? But what's the feeling over these next six months? One of the answers I just heard from somebody was just real simple, real clear, "Oh, shit."

(pause)

Six months. What's out there?

Now, feel not just your own personal feelings, now feel more on a global level, next six months. And not just about coronavirus.

(pause)

Don't try to be specific, but just the feeling, the essence of it. What does it feel like?

(longer pause)

Okay. Good. And Linda, how about the microphone again and we'll just get a real quick survey of the audience here.

What kind of feelings do you get the next six months for yourself and then related to the planet?

(music fades out)

WIM: For myself, it will be happy hours, happy days.

ADAMUS: Happy hour.

WIM: Yeah, absolutely.

ADAMUS: Every day happy hour ...

WIM: You know, to ...

ADAMUS: ... at Wim's place. Yes.

WIM: Yeah, absolutely. But generally, I had a feeling that will be the massive awakening.

ADAMUS: Massive awakening.

WIM: Massive awakening.

ADAMUS: Okay.

WIM: Massive wake up ...

ADAMUS: When you say massive ...

WIM: Massive, totally globally.

ADAMUS: Everyone.

WIM: Not everyone, but many people.

ADAMUS: What percent of the population?

WIM: I can risk even 30 percent who say “That’s enough. I have to start it over.”

ADAMUS: Right.

WIM: That’s my feeling during this ...

ADAMUS: Oh, okay.

WIM: Okay?

ADAMUS: Great. If that’s true, we’ll throw a big party for you at the Ascended Masters Club. Yeah. Eh, we’ll do that anyway, but ...

WIM: Absolutely.

ADAMUS: (chuckling) Good. And okay. Good. Thank you.

WIM: Thank you.

LINDA: Okay. More?

ADAMUS: Yep. What kind of feeling do you get next six months?

KATHLEEN: For me?

ADAMUS: Mm hmm.

KATHLEEN: Grounding my Realization.

ADAMUS: Mm hmm. How does that feel?

KATHLEEN: Being able to be in this reality, the Old Energy *and* the New.

ADAMUS: Okay.

KATHLEEN: Because I’m trying to breathe that in right now.

ADAMUS: Yeah.

KATHLEEN: Remain grounded.

ADAMUS: Yeah. Have you been grounded lately?

KATHLEEN: It’s been shifting so often. Here, there, realizing that I’m doing both and becoming more comfortable.

ADAMUS: Good days, bad days?

KATHLEEN: Yeah.

ADAMUS: Yeah. Which ...

KATHLEEN: But becoming more comfortable.

ADAMUS: Yeah. Becoming more comfortable with the bad days or the good days?

KATHLEEN: I guess both.

ADAMUS: Both. Okay.

KATHLEEN: Works both ways.

ADAMUS: And what do you get when you feel into six months on a planetary level?

KATHLEEN: I'm feeling that on a global scale that there's going to be more opportunity and recognition to share.

ADAMUS: Okay. Good. You don't think people's greed is going to take over and instead of sharing they're stealing?

KATHLEEN: Hopefully, it comes from all of those areas, private and government.

ADAMUS: Okay. Good. We have some optimists in the house.

Yes. Personal. What do you get when you feel six months from a personal level?

NANCY: Personally, I feel good. I feel happiness. I feel no fear.

ADAMUS: Okay. Globally?

NANCY: Nothing but fear holding me back. But globally I'm not as optimistic.

ADAMUS: Yeah. What do you feel?

NANCY: It always feels like maybe dissension or – I don't know why.

ADAMUS: Yeah.

NANCY: But we don't have to deal with those types if we don't want to.

ADAMUS: Yeah. What about riots or anything like that, big riots?

NANCY: I don't know, I have to think about that one. I'll get back to you.

ADAMUS: Okay, don't think too hard though.

NANCY: Okay.

ADAMUS: Because you're not going to get your real ...

NANCY: I think a smart person will ...

ADAMUS: ... intuition, if you're thinking too much. But thank you. Okay. A few more. A few more. Please.

NOMI: Well, I think personally I would be doing a little more of manual work instead of head work in designing, and growing my own food more.

ADAMUS: I understand the particulars, what you're doing, but how does it feel? Is it smooth, graceful? Is it rough? Is it anxiety? Is it happiness? How does it *feel* when you feel out six months in your life?

NOMI: Personally, relaxing.

ADAMUS: Relaxing, okay.

NOMI: Because I personally like to do things internally by myself.

ADAMUS: Right.

NOMI: And I feel more of, you know, working alone than with other people.

ADAMUS: Right, right.

NOMI: But then in six months for the public, for the world, I feel more of learning ...

ADAMUS: I'm going to interrupt, sorry, but ...

NOMI: Yes, sir.

ADAMUS: ... I'm listening to what you're saying. And you don't have to call me sir. Just Ascended Master is fine (a few chuckles). This has nothing to do with what you were saying, but just stop looking so hard. Okay? Just stop. You're really searching for yourself. *Stop it*. Just stop that constant trying to find you. When you're trying to find you, you're always going to be trying to find you, and it's right there. But you have this habit of trying to do all these things to try to find yourself. Stop that! Just take a deep breath and allow yourself. You're never going to find yourself; just allow yourself. Okay? Good.

Now, what about the planet?

NOMI: That one is hard for me to say, but I imagine the world becoming different, and like you were saying earlier, the big companies will collapse.

ADAMUS: Not all of them. I mean, some of them do just by getting big. Okay.

NOMI: Mm hmm.

ADAMUS: When you feel out onto the planet over the next six months, is it a good feeling? Is it like a disruptive feeling? What does it feel like?

NOMI: It's like you know how Kali's energy is disruptive and life giving at the same time?

ADAMUS: Yes.

NOMI: It's like that and it's blissful for some and a lot of work for others.

ADAMUS: Okay. Good.

NOMI: Yes.

ADAMUS: Thanks. One more.

SHAUMBRA 5: Thank you.

ADAMUS: Yes. Six months.

SHAUMBRA 5: Personally?

ADAMUS: Yeah, how does that feel?

SHAUMBRA 5: I'm all over the place, and it's beautiful.

ADAMUS: Okay.

SHAUMBRA 5: It's perfect. I'm actually coming out, so it's beautiful. But on a collective level, I feel like there's going to be a distinct separation. There's going to be two distinct blocks of separation that's going to take place.

ADAMUS: Good. Separated by – what's separating them?

SHAUMBRA 5: Everything. It's the consciousness. It's the energy of the entire planet.

ADAMUS: I mean, is it the elections that are coming up?

SHAUMBRA 5: No, no, no. I get the feeling it has to do with the collective consciousness.

ADAMUS: Won't that be fun to watch?

SHAUMBRA 5: Well, of course.

ADAMUS: Yeah, from behind the short wall.

SHAUMBRA 5: Yeah. It is separation between the collective consciousness.

ADAMUS: Okay. Good.

SHAUMBRA 5: Yeah.

ADAMUS: Okay, good answers. What I'm really trying to get you to do is feel into it, and there's a tendency to try to think about it and you try to think about particulars. But you feel into it. I'm going to ask for some music again, Peter. He's going to charge me a dollar for every time I ask for music today. He's going to be a rich man.

(music begins)

So, let's feel into it again, the next six months, and first for yourself.

(pause)

Six months is a pretty short time, all things considered. It takes us through end of summer, into the autumn. What does that feel like? I'm not looking for details here, not specifics, but what's the overall kind of sense you get? You know, it's one of those gut sense things. It's in your gut, not in your head.

(pause)

Okay now, now for the planet. Next six months.

(pause)

Okay.

(music stops)

I'm going to talk first about the planet, the next six months. "Unsettled," but you don't have to be an Ascended Master to figure that one out. I mean, that's kind of occurring all the time, but just more unsettled than normal. And I'm not saying "bad" and I'm not saying necessarily riots or anything like that, just very unsettled. You know that feeling of being unsettled, when you're trying to control things even in your brain or you're trying to control your life, and it's just everything's unsettled, even ungrounded. Just unsettled where you just want everything to just stop for a moment and settle down. But the next six months for the planet are going to be particularly unsettled.

For you, for the next six months, I'm going to come back to that in just a bit and talk about something. In the meantime, there's something else going on, and this one kind of gets out there, beyond.

Changes in the Order of the Arc

So there's been a lot of talk, we've talked a lot over the years about the Order of the Arc. For those of you who are new listening in, it's pretty simple. Tobias talks about it a lot in [*Journey of the Angels*](#), but it's basically the collective of all 144,000 angelic families. It's where you came from, one of those 144,000 angelic families. And they were having this little issue with understanding energy, how it worked in all of creation out there, long before Earth, long before the physical universe.

So, the energy all seemed to kind of come to a standstill, like it just wasn't expanding, moving. It was getting real like tar-like and sticky, and there was a concern that it would eventually just stop, and if it stopped, everything would collapse. Which, by the way it wouldn't have, but there was a concern back then that it would.

So the Order of the Arc was created, also known by some of you – some religions refer to it – as the archangels, but they're not a bunch of winged angels sitting around. It's more like the United Nations of the cosmos.

So the Order of the Arc was created and they considered a lot of different plans, "How are we going to try to resolve this energy impasse?" And somebody came up with the bright idea of creating the physical universe and planet Earth. Heh! We should have them tarred and feathered. And they came up with this bright idea, "Let's create physical Earth and we'll send some representatives from each angelic family down there," and that would become the portal for

anybody who ever came to Earth to go through what we call the Order of the Arc, the doorway to come to Earth. That's been the way it's been ever since angelic beings started coming to the planet and then taking on physical body.

It's all about understanding the relationship between energy and consciousness. That's what it's all about, to say, "What the big reason? Why are we here?" It's not to suffer for your sins, not to repent for Adam or Eve or her eating the apple, *none* of that. It was all about "Let's discover the relationship between energy and consciousness," because the two are so connected, but yet they don't carry the component of each other. Your consciousness and your energy are connected but not literally. Two separate components, but they always work with each other.

So ultimately, over a long period of time, many angelic beings came to the planet and took on lifetime after lifetime, many incarnations, to come to the understanding of energy and consciousness.

So here we are now in the year 2020 and there are enough humans on the planet who are developing an understanding of energy and consciousness, the fact that the energy is theirs. Consciousness doesn't have any energy, but that energy that allows you to experience life is yours. And there's variations of that with other groups, but for Shaumbra that's kind of a simple way to put it.

So, there are enough humans that understand that, that the Order of the Arc, this portal is now being disbanded, being taken down, doesn't need it anymore. New ones will still come to the Earth, but they'll come in in different ways. The Order of the Arc, their job is done and there's enough momentum, there's enough understanding of energy and consciousness that their work is now done.

That's really only occurred very, very recently, but it has a huge impact on all of you because it's basically saying the work that you've been doing is proving to be successful. The work that you're doing with your own consciousness is having a big impact.

Interferers

Then there's another important aspect of this. Over eons of time in the history of the planet there have been those of you and others who have come to this planet, taken on physical body. You've joined the community. You've become part of humanity. But there have been a lot of other forces that have been constantly interfering with the planet, constantly interfering. I do not have any love or even any like for any of these forces. They're, what you would call, alien beings. They're not necessarily human-looking. They don't even necessarily have physical body, but they have been interfering on a variety of different levels on the planet.

They've been allowed to do it for a number of reasons, and actually it's kind of interesting that we have our two guests here today from Poland, because that's one of the places they've been interfering the most in modern times. So thank you for being here (to Wim & Lydia), it's very appropriate.

What's happening right now with the closing of the Order of the Arc is that all these external forces that have been playing games on the planet, with the planet, with humanity, are being called back to their angelic families. They're being summoned, almost demanded back.

So imagine for a moment. You've got this planet, angelic beings come down here, take on the human condition, struggle a lot with it, they get lost in it and then ultimately, they emerge. But in the same time, you have levels and layers of interference from, you could say, other realms, other parts of the universe, but also other realms, not earthly realms. They interfere for their own, I would say, greedy sake. They're not here to help the planet. They really aren't.

I'll make a very clear statement: *There are no outside forces that are here to help the planet*, other than perhaps your own angelic families, but they don't interfere. There are no alien beings. There are no galactic commands. Don't get me started on the Pleiadians, but they are all being called back home.

There's an old saying that's now coming into reality, and the old saying is "When the dragon comes upon Earth, then the trumpet will sound for the return back home."

Basically, what that means is – we talked recently in [ProGnost 2019](#) – said, "The dragon..." – the dragon, which is there to make sure all of your issues are brought out and released. That's the purpose of the dragon. Dragon literally means clarity. Some view it as a fire-breathing monster, but it's there to make sure that you or others or even the planet are not dragging around a lot of old, old karma and issues. But the saying says that "When the dragon comes forth" – which is now, we talked about it in ProGnost a year and a half ago – "When the dragon comes forth, the sound, the call will go out to return home for all who are not in human form, who are not on the planet."

This is pretty huge and it overshadows anything about coronavirus. It really overshadows anything right now, even kind of about technology, at least for a little bit, and it's going to be happening over the next six months.

Imagine for a moment: When it was time to come to Earth, when all the angelic families gathered in the Order of the Arc and they said, “We need some volunteers to come here,” and it was really, what you would call, the leaders of the angelic family that first came – you – and it was said that Gabriel sounded the trumpet or the horn or whatever he played at the time, and that was the call to come to Earth. Well, now there's another call coming out from the angelic families for all who are interfering with Earth to come back.

It's going to cause a very interesting shift on the planet. Very interesting. There's been a lot of interference from the other realms, and basically what they're trying to do is just suck energy. To put it real simple, they're just interfering for the sake of sucking energy. They're not any more advanced than the humans. Most of these sources of interference do not have any understanding or experience with this wonderful little thing you have on Earth called love. They think love is an energy source and they're trying to feed off of it, but they have no understanding or experience with it. It's not an energy source. It's an experience.

There are a lot of beings in the other realms who just like interfering with the planet, just because. And, again, as I've said, in all of creation there are no beings greater than the human being. The humans look at themselves sometimes as being at the low end of the totem pole, kind of weak and misguided beings, and think there are some great beings out there somewhere else. There's not. There is not. There are some relatively intelligent life forms, but they have no heart. They have no heart.

They're being called back home now. Will all of them go? Not all, but most. They're being called by their angelic families, by their origins, “It's time to come back. No more interference on the planet right now.”

It has implications not only for what I would call the invisible forces that have interfered. You know, there have been, we call them God fights on the planet. It's these god-like beings, but they're not really. They call themselves gods and they use the planet for their own wars between each other. These are not physical beings, but they use the planet. They manipulate the planet. They've been doing it for eons of time. They're being called back.

So, feel into it for a moment here, the effect that it's going to have on Earth in these next six months as these forces, these alien forces – nonhuman, never been in a human body before – are called back.

Planetary Implications

Feel into that for a moment. What effect does that have on the planet?

(pause)

Well, a couple things. Over a period of time humans have gotten used to this outside interference, and it's going to feel a little strange not having it. It's like if you have a sore arm and you've had it sore for years, you just get used to it, and suddenly it's not sore; it just feels a little different, a little strange. That's what it's going to feel it.

Then humans, in a way, have to take more responsibility for what they're doing, more responsibility, because it's going to be them. They can't blame it on some other forces or they can't attribute these forces to try to do good things for the planet. Now it's just up to humans.

They're being called back, because it is the Time of Machines. It's the time of technology on the planet. They're being called back home to say, "Job's done down there. Order of the Arc is closing. You no longer have the right to interfere. Or, if you want to, you have to go down and embody in the physical body and live lifetime after lifetime and have karma and have incarnations and everything else," and they're not going to.

So they're leaving and it's going to cause some shifts in power. It's going to cause some who have been connected with those forces to suddenly lose their, what you would call, power base, and it's going to cause some of them to leave the planet. It's going to cause some who have been here even as observers to go back home now.

The planet becomes the planet for humanity without outside interference. Now it's up to humans to decide what they're going to do at this very important time of technology. And will humans use the technology for the betterment of the planet? Or will it strike up a virus that will make this current coronavirus look small in comparison?

So you're going to feel that. You're going to feel some shifts and changes over these next six months on a planetary level, and I'm going to ask each and all of you to then kind of observe what's happening in the news, as you feel some of these forces withdraw. And it

could be a wonderful feeling. Now it's like you don't have that spook in the house anymore. You don't have all that outside feeling of disruption and "there's some other force out there that's interfering," because it does weigh heavy. And again, Wim, you know from being in Poland, and Lydia from being there, Poland's a beautiful place, but it's been the battlefield of the gods, as we talked about when we went there (referring to [Angels & Aliens](#)). It's been used by these outside forces for their own battles and affected all the people there deeply and heavily for a long time.

So we have all this going on on the planet right now. It'll be a real interesting timeframe. But now let's talk about you. Let's talk about you for the next six months. I'm going to give you a couple of contradictions here.

Personal Implications

First of all, I've asked you over and over about your commitment to Realization. It's no small thing, because it comes first in your life before anything – before family, before jobs, before anything. That's a tough one for most people. They're not used to putting themselves first, and they feel guilty about it. But you've been asked over and over, "Are you going to put your Realization first?"

You can't go into enlightenment, into Realization if you're putting others first. It won't work. It simply doesn't work. And then this guilt feeling – "But my family and my friends" – it comes up. That's why I've asked you over and over these years, "How is your commitment to your own Realization? Is it there? Are you ready?"

So it's about a huge commitment that's taking place, but right now the contradiction is you're going to feel the most doubt ever. The most doubt ever. That's what happens right before Realization. Inside, any doubts that you carry, are going to come up. So I'm asking you for the next six months when that doubt comes up, don't fight it. Don't

try to mentally justify it or beat it down. Just realize it's an old doubt. It's mass consciousness trying to pull you back in. It's part of yourself that's so used to a thousand lifetimes on the planet that's saying, "Am I really, really ready?"

So you're going to feel a lot of doubt. And actually feel into it. Don't run from it. I mean, dive into it. Feel it, because in everything, whether it's doubt or joy, whether it's happiness or fear, it's ultimately brought to wisdom. It ultimately serves you. Don't be afraid of it.

Decisions

So the other thing that may seem to be a contradiction, I'm asking you, I've talked a lot with you in the past about choices – "Make a damn choice. Do something. Make a choice." When we first started working together, I said, "Just choose *anything*, just *something*," because I wanted you to remember that you can make choices, I mean, big choices in your life. Not little choices of what socks to wear or what kind of wine to drink, but big choices that you could.

But now I'm going to ask you, for the next six months, not to make any big decisions in your life at all. Nothing big. It's what I call the "slide and glide time." (Adamus chuckles) Just kind of let yourself slide,

just let yourself glide for six months. No big decisions. And some of you have some very big decisions that you're facing right now, or you thought you were facing. Don't make any. I'm not talking about the little stuff, you know, what restaurant you go to or anything like that. Big stuff. What's the big stuff? Jobs? Relationships? Staying on the planet? Moving? Going somewhere? And I'm not saying don't do it; I'm saying just don't make a decision about that.

Now is the time just to have absolute trust. I talked a lot about trust in that first book we put together with Shaumbra, [*Masters in the New Energy*](#), about trust. I come back to it now and say it's really time to trust yourself implicitly, to stop trying to manage, manipulate everything and just trust. Just allow your divinity. Just allow that part of yourself, that sacred divine part of yourself to be there. Not making a bunch of decisions, but just allowing. You'll find that a lot of things happen. It's not like you're going to be sitting there bored for six months. A lot of things happen in your life.

Big decisions? Wait.

Now, a question just came up through the Internet. Somebody just said, "Well, what if I get pregnant?" Well, you weren't making a decision to get pregnant. It just happened, so therefore you're safe. You didn't make a big decision (a few giggles).

If you're thinking about – you don't like your job – you're thinking about changing, don't. It may change. You may walk in on Monday and get fired. Ask for a nice severance package, but you didn't make the decision, it happened.

You get home next week or the week after and you walk in and your house is cleared out, no more furniture, and your bank account is wiped out. Your partner took everything while you were gone. Well, you didn't

make the decision, they did. So, don't *you* make the decision that you're going to end the relationship, just let it happen. Next six months, no big decisions. Just allow whatever comes along to happen.

So I want to do a merabh with that. A merabh, for those of you who are new, it's the time that we take to get out of the brain, to get into the consciousness shift. It's kind of like just a nice – you listen to music and you allow the consciousness to shift. You don't work on it in the brain. That's a merabh.

Questions & Answers

But before we do the merabh, I'm going to take a few questions, because I know it's suddenly – if there was a switchboard on the Internet, it'd be lighting up right now. I don't know if you here in Kona have questions, but I'll take a few. I want to clarify when I say, "six months, no big decisions."

And the first question should be, "Does the six months you're talking about have anything to do with this whole thing about the call back home?" And the answer is obviously yes.

Yes, next question.

SHAUMBRA 2: I was just thinking about maybe buying a little house, so is it considered a big decision?

ADAMUS: Yes (she chuckles). Yeah.

SHAUMBRA 2: Okay.

ADAMUS: Yeah. Well, how little of a house?

SHAUMBRA 2: Eh, one bedroom.

ADAMUS: One bedroom.

SHAUMBRA 2: Yeah.

ADAMUS: Well, to you, is that a big decision? I mean ...

SHAUMBRA 2: Not really.

ADAMUS: Not really.

SHAUMBRA 2: No.

ADAMUS: Then that's fine, but if you're having to really kind of contemplate, "Is it good? Is it bad? Should I do it? Should I not? Do I have the money? Not." If it's not a big decision, if it's just kind of something you do every day ...

SHAUMBRA 2: Yeah, just something that makes sense to do.

ADAMUS: Yeah, yeah. Okay. Yeah, but if it feels like a big decision, if you're having to really stress over it and think about it, then don't do it. Just wait.

SHAUMBRA 2: Okay. Thank you.

ADAMUS: What else? There's another big decision you were thinking about.

SHAUMBRA 2: Ooh. Maybe you know (Adamus chuckles). Tell me (she chuckles).

ADAMUS: I'd like you to feel into it. What else?

SHAUMBRA 2: Relationship, maybe?

ADAMUS: Yeah. Yeah, yeah.

SHAUMBRA 2: So don't decide. Just keep going with whatever weird ...

ADAMUS: Yeah, yeah (laughter)

SHAUMBRA 2: ... thing.

ADAMUS: You want to tell us about that?

SHAUMBRA 2: I'm okay with that.

ADAMUS: What about the relationship?

SHAUMBRA 2: Oh, it's just been going on for years, but it's not really concrete.

ADAMUS: Right, right. Yeah.

SHAUMBRA 2: Which is – what I find is that it actually works for me.

ADAMUS: How many years?

SHAUMBRA 2: Seven.

ADAMUS: Oh. Yeah, don't make any decision about that right now.

SHAUMBRA 2: Okay.

ADAMUS: Now is not a good time for that kind of – that's a big decision.

SHAUMBRA 2: Okay.

ADAMUS: Yeah, yeah.

SHAUMBRA 2: Okay. Thank you.

ADAMUS: Good. Yeah.

LULU: Okay, so at this point of my life, I'm kind of homeless.

ADAMUS: Mm hmm.

LULU: I don't have a home.

ADAMUS: Right.

LULU: So I was thinking on ...

ADAMUS: Where do you sleep at night?

LULU: Hotels.

ADAMUS: Hotels. That could be nice.

LULU: Yeah, and very expensive (she chuckles).

ADAMUS: Yeah, yeah! Good hotels?

LULU: Good hotels.

ADAMUS: Oh, good, good. Yeah.

LULU: And actually I bought me a Tesla, which I get free charging and I just travel around without spending a penny.

ADAMUS: You could hook up a camper to the Tesla and now you've got a home and a car.

LULU: I do have a camper.

ADAMUS: Yeah. See? Not homeless.

LULU: Well, in it's the shop.

ADAMUS: So what's your question? Were you going to buy a house?

LULU: I was in the process of getting a house to kind of settle.

ADAMUS: Yeah. Have you looked at it?

LULU: Yes.

ADAMUS: Have you made a decision about the house?

LULU: I already gave a down, but ...

ADAMUS: Oh, then you're fine. You already made the decision. Yeah. That's fine. Yeah. So not to worry.

LULU: But the financial company, they haven't made a decision for me yet.

ADAMUS: Right. Well, that's when I say then just allow things to happen. Right. But you've already made the decision prior to this, so that's a done deal. Now just let it go and see what happens.

LULU: Okay.

ADAMUS: Okay?

LULU: Okay.

ADAMUS: Good. Is it a big camper? (a few chuckles)

LULU: It is a Mercedes Wind 5, wind – how you call it? Yeah.

ADAMUS: Yeah. Pretty big.

LULU: It's a really fancy nice one.

ADAMUS: Yeah, good.

LULU: Yeah.

ADAMUS: Okay. Couple more questions.

JEAN: I would just like to know what happens for the people who read this in the future, that aren't here today.

ADAMUS: Yes, and how would you answer that?

JEAN: Be in the moment.

ADAMUS: It applies when they read it, when they watch it.

JEAN: Okay. Thank you.

ADAMUS: It applies then.

JEAN: Thank you.

ADAMUS: So for this group that's watching now or in the immediate future, it applies now. If you're watching this later on, it applies to the timeframe you're watching it in. Yeah, because otherwise, yeah, it would be ...

You're not intimidating anybody are you? (some chuckles)

JESSICA: I feel really anxious, but ...

ADAMUS: That's okay.

JESSICA: ... do I have to stand?

ADAMUS: I'm always nice. No, no. You can stay seated please.

JESSICA: I'm getting married in August, and that's I feel like it's a big decision.

ADAMUS: That's a big decision, yeah.

JESSICA: A huge decision. I mean, I feel like I wouldn't ever change my mind.

ADAMUS: Do you know the person? I mean, have you met them yet? (laughter)

JESSICA: We've been together for ten years.

ADAMUS: Oh, ten years.

JESSICA: Yes.

ADAMUS: Not a big decision. And you already made the decision to get married.

JESSICA: So that's ...

ADAMUS: Right, right.

JESSICA: Okay.

ADAMUS: Yeah. No, you're fine.

JESSICA: All right! (she chuckles).

ADAMUS: You're fine. Yeah. Whoa! Whoa! Yeah.

JESSICA: My heart's beating so fast!

ADAMUS: No, if you've already made the commitment to something – getting married or getting pregnant or buying a house or starting a business – if you've already made a decision, then go ahead with it. I'm talking about any new big decisions right now.

JESSICA: Okay.

ADAMUS: Good. Oh, and I can just feel, as we're talking here, that Shaumbra social media is just lighting up right now with all this talk. Yeah. Good.

MICHELE: Why?

ADAMUS: Why? Why? Oh, I thought it was just a philosopher's question.

MICHELE: (chuckles) No!

ADAMUS: Why? Because. Why? We're going to do a merabh and I'll explain more, but why do you think?

MICHELE: Well, with all the changes and things that are happening that we're changing as well, and that things that the decisions we might make today would be different in six months because of who we are going to be in six months.

ADAMUS: Perfect. Yeah.

MICHELE: Okay.

ADAMUS: Yeah. Right now is not a good time to make the decisions, because there are changes happening within you on so many different levels, and if you make a decision today, it's not really going to be so applicable six months from now.

Also, I want you to get used to now allowing and trusting yourself. Not outside forces, but allowing and trusting that it just works out for you. We're also going to go into having to make a lot less decisions. It's just there for you, and that's the Merlin. That's the Master within. It's there before you need it. You don't have

to struggle in the old human decision-making process, not very often anyway. You can occupy yourself all day long by deciding what you're going to eat or drink or where you're going to go for a walk, but the big stuff starts taking care of itself. It's an amazing way to live. And it's weird that it's happening also at this whole time of the call going out to return home. Not you returning home, but those who have been here as the interferers on the planet are being summoned back. Yep. Good.

KATARINA: You've kind of answered already my question, because my question is at the moment so much is changing in my life, and I have the feeling I have to make a lot of decisions.

ADAMUS: Isn't that a burden? "What am I supposed to do?" Could you imagine? You just don't have to. It just kind of works out.

KATARINA: Yeah, and that's what you said, like my heart just went like this (opening), because I have the feeling I can't even make those decisions and that things are just happening. So what I'm trying to do is like follow my heart and like go with the flow and see where it leads me.

ADAMUS: Yes.

KATARINA: But at some point one needs – kind of like in the human life reality – needs to make decisions.

ADAMUS: Right.

KATARINA: So is it about allowing and things are happening and the only kind of fear is like, "If you don't" – I heard this – "if you don't make a decision, I will make them for you."

ADAMUS: Yeah, and that's appropriate for most people, but not where we're going right now.

For most people, it's important that they make the decisions, that they go through the experience, take the responsibility. But now we've really shifted gears and you'll come to realize you just don't have a lot of decisions to make. The things are just happening and it's you, it's your divinity, the Master, the Merlin, whatever you want to call it, and it's just happening. The house is there, the job is there, the relationship is there. When you're on human decision making, it goes mental sometimes – no, it goes mental almost all the time – and what's happening is you think you're making decisions based on facts, but you're making it based on limitations.

As you stop trying to make big decisions in your life, it opens you up and releases the limitations, and suddenly you realize things are happening and they're very appropriate and they're not scary and it's perfect for you. And you realize that you don't need to make all those little decisions or even medium-level decisions anymore. It's just happening, but it's fulfilling your heart. And, in a way, you can say, "I already made the decision. I made one decision to be all that I Am," and now it's happening.

KATARINA: Yeah, that makes a lot of sense.

ADAMUS: So you get off of – you started by saying, oh, you just had all these decisions to make – *phew!*

KATARINA: Yeah, a lot of stuff happened. I didn't even kind of decide. It just happened, and in a way even better than I could ever imagine.

ADAMUS: Yes.

KATARINA: So it's kind of a weird time at the moment, but great ...

ADAMUS: Better than you could ever imagined. That's the key. That's the key.

KATARINA: Yes! (she chuckles) Yes.

ADAMUS: And a lot of times when a human gets involved in the decision making in their life, it's really based on limitations. Just feel into a lot of your decisions you've made in your life. It wasn't based on huge, kind of crazy-beyond potentials. It was based on limitations. It was based on – and I say all the time, every human decision, every choice – is based on emotion, not on intellect, not on fact. It's justified with facts, but every decision, even what you're going to eat this afternoon, is an emotional decision. And then you justify it by saying, "But this is healthier for me" or whatever. But every choice, every decision is based on emotion.

The fact is we're going beyond all that having to make all those really limited life decisions. The thing about it is this is the time you're truly walking with the Master, truly walking with the Merlin that's already there within you. Good.

Two more questions and then we'll do a merabh. Yes. All the way in the back.

HORACE: Thank you. I was planning to buy a home this year, whether it's going to be a condo or a house or even a building, and it just feels like I can't end the cycle of renting. I'm back again renting.

ADAMUS: Right.

HORACE: So ...

ADAMUS: But you already made the decision.

HORACE: I did, yes.

ADAMUS: Okay. Now, you don't even have to worry about it, things just happen. The decision is already made, so you're not trying to make a decision. You're not standing here right now and saying, "Should I or shouldn't I?" You already have the commitment. The energy is already in motion. It's already collecting the things that you're going to need to come in to manifest this for yourself.

You can play the game and pretend you're making a decision about whether it should be a condo, a house, this cost or that cost. You can play that game, but I'd just let it go right now and watch how the energy comes in and serves you, rather than all those decisions and concerns and everything else. And it's going to be scary at times, because you're, "Oh, I should be thinking about this. I should be making decisions. I should be focused on it." No. No.

HORACE: Well, it's not really doubt. It's more irritation and anger. I'm just fed up with it.

ADAMUS: Yeah.

HORACE: I just want stuff to move along.

ADAMUS: Right. But you already made the decision.

HORACE: Yes.

ADAMUS: So you're fine. I'm just saying from this point on don't make any big decisions for six months. You've already decided that's what you want, so it's in the works.

HORACE: Okay.

ADAMUS: It's coming your way.

HORACE: Thank you.

ADAMUS: I mean that seriously. And not what you necessarily expect today.

HORACE: Good. I know that I'm limiting myself and I'm happy to hear that. So, it's good. Thank you.

ADAMUS: Good. One more question. I know there's one more question somewhere in here. Perhaps not.

SHAUMBRA 7 (man): I have no question. I only – I get Realization, because after six months I think I get Realization (he chuckles).

ADAMUS: Yeah. Okay. Or maybe before six months.

SHAUMBRA 7: Oh. Hm?

ADAMUS: Maybe you'll get Realization before six months.

SHAUMBRA 7: Now, before six months?

ADAMUS: Yeah.

SHAUMBRA 7: Oh. Six months, before six months, I only take Realization (he chuckles).

ADAMUS: Yeah. Good. That's good. Yeah, but you've already made a choice for that, so you don't even need to worry. Yeah.

SHAUMBRA 7: Thank you.

ADAMUS: Thank you. Okay, now let's put on music.

Merabh

Okay. It's time for a merabh, time to just allow a consciousness shift.

(music begins)

I'm going to be talking a little bit. That's what I do during a merabh, but not much. It's time to take a deep breath and – *wow!* – feel into everything that's going on.

You've got this coronavirus. It's a big distraction. It's disrupting a lot of things, but it's really a big distraction from the other things going on on the planet. I mean, it's real. It's about the economy. It has everybody all concerned and jumpy.

Then you've got this other thing going on that most people will never realize. At the same time right now is the Order of the Arc is closing down. It's not needed anymore. There are enough humans on the planet that are really beginning to understand their sovereign relationship with energy, with their own energy.

The Order of the Arc is not needed. New ones will be coming to this planet, but there are many new Earths now. They'll be going there also.

And as the Order of the Arc ends its business, it's called for all of the interferers to go back.

Angelic families are calling back all of their own, "Time to come home now."

It's not only going to affect the ones who have been lingering around the invisible realms of the planet. It's going to affect the humans that they've been working with. And they're not all sinister either. They're not all trying to wreak havoc on the planet. Some of them are here to learn things for their angelic families.

They're being called back and I'm going to make a – (Adamus chuckles) Cauldre doesn't want me to say this, but I'm going to make a wild statement here. I put the Pleiadians in the same category as the interferers. I have nothing good to say about the Pleiadians, and those who are saying, "Well, let's all have peace, love and joy." No. I don't like them. They lie. They cheat. They've interfered with this planet for far too long. They've connived otherwise really good people into channeling them. They're manipulative. They're energy stealers, and there's going to be a lot of these supposed Pleiadian channelers that just stop channeling, just suddenly feel there's nothing there. And there's going to be some of them that continue. It's going to be totally bogus, because the Pleiadians are being called back. And you can tell them I said that.

Yes, I am banned from Sedona. I am, and I'm proud of it. You realize I'm the only Ascended Master that's not allowed to go back to Sedona? (Adamus chuckles) For good reason.

So all this is happening. They're being called back home, so the planet now can go forth on its own, in its own way, its own people. It can go into this new species of humans without the interference. It can go into a whole new understanding of energy and consciousness without this cloud of alien interference.

These next six months are going to be very interesting. And, again, don't just watch the headlines, but what's underneath the headlines, what's in between, what's on the other pages of the news, if you still have newspapers. Do they exist anymore?

But just feel into what's going on on the planet over these next six months and, more important, for you, personal.

No big decisions. There's a reason for that. You're going from a time now of having to make all those decisions on your own, whether it's about relationships or a house or job or kids or direction in your life, and now you don't need to do that. You're going to find that what's really in your heart, what's truly in your heart – not the decisions that are in the mind, but what's truly in your heart – starts to manifest in your life.

In the past, when you got into your head, you actually messed up a lot of the decisions or the opportunities in your life.

Now is a time really to trust.

You're trying to think you have to make decisions about everything. Well, that's kind of not being in trust. Now is that time to trust that you – the Merlin, the Master, you – make all these things happen.

It's not an outside force. It's actually, as these things happen in your life now, as your real heart desires, start taking place, you'll realize it really is you. It was just that part of you that you locked off for a long time.

And after the six-month period of not making the big decisions, I think you'll start to realize that there aren't going to be very many big decisions you need to make anymore.

You're in a whole different flow. You're in a different state of grace, and it's just happening.

What's happening is that energy is responding to you – your energy responding to your heart. Not the mind trying to figure everything out in a state of limitation, but you suddenly realize that this is how energy works. It feels into the heart. It feels into the real desires, and then it just happens.

The energy serves you. It brings the right people at the right time, the right opportunity. You don't have to work at it, stress at it.

So, for the next six months, no big decisions. Just trust and allow and watch how things change.

It's all kind of an interesting time of convergence. With the alien interferers being called back home now, with all this stuff taking place on the planet, with the coronavirus, with all the changes in technology, look how everything is kind of converging.

Take a deep breath and look at where you are right now, rising above the noise and the confusion and the chaos.

Good deep breath.

So, with that, you don't have to worry about the big decisions and just watch then how the energy works in a different way to serve you.

(music stops)

With that, I am delighted, as always, to be with you. I'll come back to Kona any time to be here for the Shoud or any other occasion.

Let's take a good deep breath as we end this session, and the reminder that all is well in all of creation. Thank you (audience applause).
