

THE STAR OF DAVID – MERKABAH

IN THE NEW ENERGY SERIES 4 – NOVEMBER 1, 2003

TOBIAS

one week from today an interesting alignment takes place... also at a time of a lunar eclipse... a hiding and then a revealing, a light and then a dark. the harmonic concordance is the alignment of the planets into the STAR OF DAVID. it is created by two equilateral triangles overlapped onto each other.

it is also the symbol of the MERKABAH. but, what it really is, and what your MERKABAH really is... we are often so amused at humans who do all this spinning of the MERKABAHS. (some laughter) you are digging yourself in deeper and deeper. you don't understand the very simple nature of the symbol and of your own MERKABAH.

two equilateral triangles, one on top of the other to create the STAR OF DAVID... they represent the essence of duality.

one points upwards. one points down... up and down. one triangle is the male energy. it is the phallic energy... the out-going energy... the action energy...

the other. the inverse is the feminine. it is the grounded energy and the nurturing energy. it is the vessel. yes, it is the vessel. it is the chalice, as so many of you have been reading about (referring to the current novel entitled "the da vince code," author dan brown).

these two energies overlap – male and female. they are up and down. they are also representative of – what you would say – light and dark, good and bad. and, they are representative of divine and human.

they have been separated. don't you see? they have been separated for a long, long time. the core energy of separation is the male and female energies, the adam and the eve. ever since you left home, you see – ever since you began exploring self – you divided yourself. you do it now in physical form, male and female. there is a masculine and a feminine energy, a yin and a yang.

that is all the STAR OF DAVID ... separated, pulled apart (like a diamond split in half).

what happens when these two are brought back into alignment together? instead of six points, there are four.

dear friends, stop spinning these merkatic energies in opposite directions. what is going on with this? do you think you are going to be more powerful or smarter? you are only intensifying the energies of duality. for a moment it may feel good. it is not something that came from us – to spin these energies. we have to slap our heads. we have to slap our heads when we see you doing this.

the energies were meant to be brought together. and, in seven days from now (november 8 2003) is the time. it is the potential for this to start, for these two equilateral triangles to come back together.
